

Antistatic AK-A45

DESCRIPTION

Antistatic AK-A45 is a very strong anti-static agent which is used for polyester fibers. Antistatic AK-A45 is suited for spinning and drawing stage.

Specification

Appearance	Clear Yellow Liquid
Nature	Alkyl Poly Oxide Amide
Ionity	Anionic/Nonionic
pH (1:10 solvent)	7.5 ± 0.5
Solubility	Soluble in water

Product Handling, Storage and Shelf Life

To ensure safe storage of this product, containers should be well sealed to prevent water evaporation and skin forming. The product must be stored between 5-25°C for maximum 6 months. Freezing and direct sun light must be avoided.

Applications and Recommendations

Antistatic AK-A45 is a great anti-corrosion with low volatility, excellent penetration ability and high thermal stability. Antistatic AK-A45 is a useful 8 – 12% emulsion in spinning process, and 10 - 14 % emulsion in drawing stage of staple polyester fibers. The OPU is between 0.3 - 0.9%. This solution has excellent moisturizing properties for polyester fibers.
