

## CONCLUBE SNF-01

**Conclube SNF-01** is a spray dried fine powder which is soluble in water, acid, alkali and hard water with good dispersion properties.

### Properties:

Appearance	: Light brown powder
Nature:	Sodium salt of poly naphthalene sulfonic acid
Ionity	: Anionic
pH (1:10 solution)	: 7 - 8
Solid Content	: 98 ± 1 %
Solubility	: Soluble in water
Sulfate Content	: < 1%
Density @ 20°C	: 0.65 – 0.75 gr/cm <sup>3</sup>
Packing	: 25 Kg bags or 1000 Kg Big bags

### Applications & Recommendation

**Conclube SNF-01** has different applications such as:

- Superplasticizer and retarding agent in concrete formulations.
- Dispersant for dyes, synthetic rubbers and resins in emulsion polymerization.
- Tanning agent for leather industry.
- Base for spreader of agricultural chemicals.
- Dispersing agent for dyeing process in Textile industry.
- Dispersing and wetting agent of paper processing aids.
